QG series

QG40N-KIXv-360-SPI-PTS-5V

Inclination sensor

1 axis vertical mounting

Non-programmable device

Interface: SPI

communication protocol DIS-special

Measuring range 360°

QG series

DIS sensors

SPlout = 18000 * (α/180)

Centering: eliminate mech. Offsets Centering by SPI command

QG40N-KIXv-360-SPI-PTS-5V

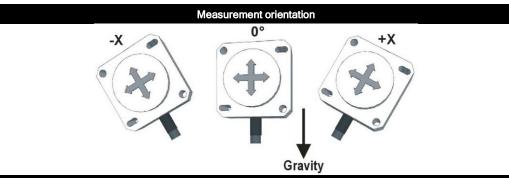

Rotation in vertical plane.

Lateral tilt sensitivity error: $< \pm 0.03^{\circ}/^{\circ}$ lateral tilt (typ.) Max. lateral tilt: 45°

Drawn in default 0° position.

Intended use, UL, SPI-Interface, Remarks

QG series sensors are intended to measure inclination/acceleration/tilt. Flawless function (acc. spec.) is ensured only when used within specifications. This device is not a safety component acc. to EU Machine Directive (ISO13849). For full redundancy two devices can be used. Modifications or non-approved use will result in loss of warranty and void any claims against the manufacturer.

SPI-protocol according to separate document [revision 2.3a]

As this device is accelerometer-based the sensor is inherent sensitive for accelerations/vibrations. Application specific testing must be carried out to check whether this sensor will fulfil your requirements.
