

## CONFLICT MINERALS DECLARATION

Dear Reader,

We find it very important to ensure that the tin, tungsten, tantalum or gold are not being sourced from mines, which finances armed groups and military forces who commit serious violations of human rights.

Despite that we do not have obligations under the regulations, Section 1502 of the Dodd Frank Act and EU Conflict Minerals Regulation 2017/821, we do instruct our suppliers to monitor this requirement, and to be able to trace their supply chain back to the mines where their minerals originate, anyhow.

Our CMRT file is available upon request ([info@dis-sensors.nl](mailto:info@dis-sensors.nl)).

This declaration covers our standard sensors (see product selector at [www.dis-sensors.com](http://www.dis-sensors.com)).  
It does not cover customer specific sensors with non-standard hardware.

Yours sincerely,

P.A.H. Hoksbergen  
QA Department  
DIS Sensors BV
